

Stomach Trouble and Constipation.

Those who are afflicted with stomach trouble and constipation should read the following: "I have never found anything so good for stomach trouble and constipation as Chamberlain's Tablets. I have used them off and on now for the past two years. They not only regulate the action of the bowels but stimulate the liver and keep one's body in a healthy condition," writes Mrs. Benjamin Hooper, Auburn, N. Y.

J. Tevis Groves left Friday morning for Jacksonville, Florida, where he will enter a training school in the Quartermaster division.

Chamberlain's Cough Remedy.

This is not only one of the best and most efficient medicine for coughs, colds and croup, but is also pleasant and safe to take, which is important when medicine must be given to children. Many mothers have given it their unqualified endorsement.

Miss Caroline Field went to Kansas City Tuesday morning for a visit.

Henry Dankers went to Kansas City Tuesday morning on business.

How to Prevent Croup.

In a child that is subject to attacks of croup, the first indication of the disease is hoarseness. Give Chamberlain's Cough Remedy as soon as the child becomes hoarse and the attack may be warded off and all danger and anxiety avoided.

Miss Lillian Harrison went to Kansas City Tuesday morning for a few days' visit.

Chamberlain's Tablets.

Chamberlain's Tablets are intended especially for stomach troubles, biliousness and constipation, and have met with much success in the treatment of those diseases. People who have suffered for years with stomach trouble and have been unable to obtain any permanent relief, have been completely cured by the use of these tablets. Chamberlain's Tablets are also of great value for biliousness. Chronic constipation may be permanently cured by taking Chamberlain's Tablets and observing the plain printed directions with each bottle.

TO SIMPLIFY AIRPLANES**Aviation Officials Will Try to Reduce the Number of Parts.**

Amazing figures as to the number of parts and amount of material entering into construction of an airplane have been assembled by army aviation officials in an effort to simplify construction as a means of hastening production. While the present program cannot be delayed for the result of this investigation, it appears likely that a way will be found later to reduce greatly the number of parts and kinds of material now needed.

Exclusive of the engine, there are hundreds of parts in the structure of an airplane, and even when built-up sections of the frame are regarded as single parts, there remain nearly 200 separate pieces to be assembled into a completed machine. That is exclusive of screws, nails, and similar items.

These are the things necessary to build a machine without its engine:

Nails, 4,326; screws, 3,377; steel stampings, 921; forgings, 798; turnbuckles, 276; veneer, 37 square feet; wire, 3,262; varnish, 11 gallons; dope, (for dressing wings,) 59 gallons; aluminum, 65 pounds; rubber, 34 feet; linen, 201 square feet; spruce, 244 feet; pine, 58 feet; ash, 31 feet; hickory, 1 1/2 feet.
